

Introducing **Maxim RX-9s** Replace-A-Station feeder from Output Technology.

Feed a wider variety of product types with the Maxim RX-9s Feeder.

The Maxim RX Series' innovative feeding technology make it the most economical feeder line on the market and the chosen solution for most feeding applications.

Feed a wider range of product types and thicknesses with the patent pending separator blade. Set up is simple and tool-less. Simply place a piece of media under the blade and set the thickness knob. Adjust your side guides and wedge blocks and you are ready.

The RX-9s is a "replace-a-station" feeder for sing-arm inserters. It can also be used as a continuous run feeder for inkjets, tabbers, and more by simply repositioning the photo-sensor

### Features

- Patent pending Blade™ separating tab and variable pre-gate for maximum flexibility in feeding a wide range of product types
- Pre-stretched feed belt for long life and maximum uptime
- Magnetic wedge blocks for infinite support positioning
- Tool-less sensor adjusting arm for quick setups
- Powder-coated steel and aluminum for long durable life
- Can be used as a continuous feeder as well for inkjet and tabbing
- Easily sets up in seconds for maximum operator efficiency

### Specifications

**Utilities:** 120vac—3A—60Hz

**Speed:** Variable up to 400 feet per minute

**Interface:** Photo-sensor

**Stack Height:** Up to 16"

**Weight:** Only 22 pounds

**Price:** \$2,399.00

**Dimensions:** 9.5" W x 9.25" L x 18.5" H
